

Managed Endpoint Detection and Response

Stop Threats Early

Endpoint Detection and Response (EDR) is a critical layer in a modern security strategy—focused on identifying and stopping threats at the endpoint. Through Secur-Serv’s partnership with Huntress, managed EDR combines 24/7 monitoring and expert threat hunting to cut through noise, surface real threats, and stop attackers before disruption occurs.

The result is faster detection, fewer false alarms, and less strain on your team—giving you clear, validated insight so you can respond with confidence and stay focused on running your business.

<1% false positives—so your team can focus on what drives your business forward.

Built-In Protection

Secur-Serv’s managed EDR delivers a fully managed approach to endpoint security, with each component working together to identify and stop threats before they impact your business—providing continuous monitoring, expert analysis, and guided response without added complexity.

-  **Managed Microsoft Defender Antivirus**
-  **Managed Endpoint Threat Detection**
-  **Human-Led Investigation**
-  **Threat Containment & Elimination**
-  **Guided Cleanup & Recovery**

Security That Delivers

-  **Comprehensive Visibility:** Surface real threats fast—no noise, no blind spots.
-  **Expert-Backed Detection:** Threat experts validate every alert, so you only see what matters.
-  **24/7 Threat Response:** Continuous monitoring and rapid response to stop threats in their tracks.
-  **Predictable, Scalable Protection:** Enterprise-grade security with simple, transparent pricing.

You Shouldn't Have to Choose Between Security and Budget

So what if the real risk is not the cost of protection, but the assumption that it is out of reach?

Secur-Serv makes enterprise-grade endpoint protection more practical for growing businesses. With 24/7 monitoring, real-time detection, and expert-led response, you get serious security without enterprise overhead.

The question is not whether your business deserves that level of protection. It is what has been stopping you from having it.

60% of businesses that get hit by a cyberattack never reopen.

Complete Endpoint Protection

Built for Security	24/7 Coverage	Validated Threat Detection	Rapid Response	Simplified Security Spend
Enterprise-grade endpoint protection, fully managed by experts—so nothing gets overlooked.	Continuous monitoring and response from a global SOC, focused on the threats that matter.	High-confidence alerts backed by expert validation—no noise, minimal false positives.	Fast containment and active remediation to stop threats before they cause disruption.	All-inclusive pricing with no add-ons—delivering full protection without surprises.

What to Look for in a Reliable EDR Solution

The best EDR solutions should provide capabilities such as:

- ▶ Detecting and identifying endpoint security incidents—so your team doesn't have to
- ▶ Uncovering threats that bypass other security controls, including antivirus
- ▶ Containing incidents at the endpoint and stopping them before they spread
- ▶ Separating critical threats from false positives to reduce alert fatigue
- ▶ Isolating infected devices to prevent malware from spreading across your environment
- ▶ Delivering guided remediation to remove uncertainty and speed up response
- ▶ Reporting on the scope and potential impact of threats across your environment

of breaches are attributed to compromised endpoints—turning everyday devices into one of the biggest risks to your business.

Don't Wait for a Threat to Expose the Gap

Cyber threats don't wait—and without the right visibility and response, a single compromised endpoint can impact your entire operation. Managed EDR helps identify, investigate, and stop threats before they spread. Take the next step toward stronger protection with Secur-Serv.

Stop Threats Before They Disrupt Your Business.

Don't leave your endpoints exposed—call **800.228.3628** or visit **www.secur-serv.com** to take the next step toward stronger protection.

About Us

Secur-Serv is a leading provider of managed services nationwide, delivering innovative solutions that empower businesses to optimize their IT, hardware, and printing infrastructure. We prioritize the security of our client's data and systems through proactive cybersecurity measures and strive to surpass expectations with exceptional service.
