

SECUR-SERV

The Road to Warehouse Modernization

The next phase of manufacturing and warehouse modernization will be defined not only by the technology companies deploy, but by how effectively they manage the devices connecting people, data, inventory, and operations.

Fast and furious on-demand economy

Organizations plan to go large in the next five years

87% will increase warehouse size

86% will increase volume of items shipped

Facilities agree the need for speed is driving this expansion

40% see increased consumer response

46% need to support faster delivery to the end customer

Pressures of warehouse evolution

Tech Implementation

currently see IT technology utilization as the top operational challenge

believe tech implementation is the key to competing in an on-demand economy

Supply Chain Visibility

plan to modernize with real-time locationing systems

expect to be using a full-featured warehouse management system (MMS)

Labor Pains

plan to increase technical or supply chain training to retain labor

agree technological transformation will increase career appeal
