Managed AI Services

SECUR-SERV

Manage adoption, security, deployments and performance as your business evolves.

AI is evolving quickly, and keeping up shouldn't take time away from running your business. Managed AI services provide ongoing visibility into AI usage, help reduce risks, and demonstrate business value through regular reporting and insights.

What is Included With Managed AI?

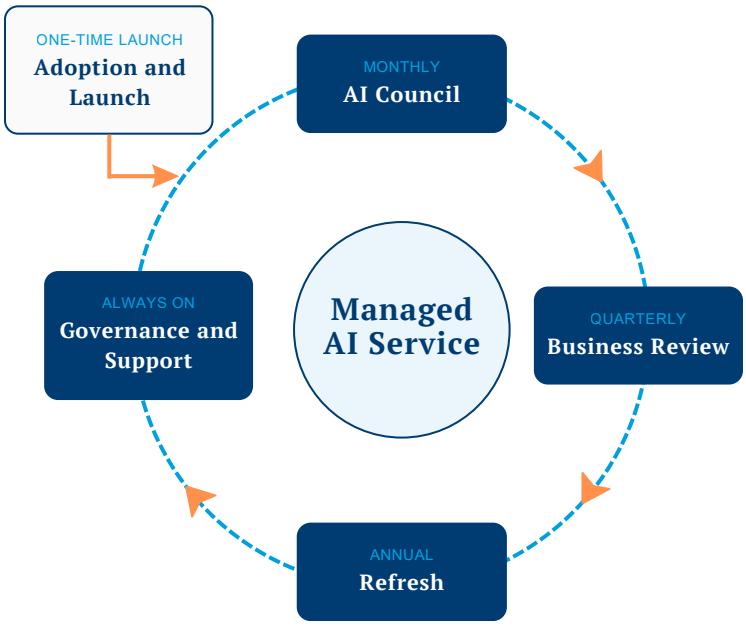

You don't have to manage AI alone. From initial adoption and launch to quarterly business reviews, annual refreshes, and ongoing governance and support, Secur-Serv provides a continuous partnership focused on making AI work better for your business.

1. **Agent and Deployment Lifecycle —** Every AI agent is built around a defined business use case, tested with your organization's content, and deployed to the appropriate users to support reliable, practical adoption.
2. **Observability and Measurement —** Track AI usage by department and measure results against established baselines to understand adoption, productivity improvements, and return on investment.
3. **Governance, Risk, and Data Protection —** Support secure AI adoption through established safeguards and monthly reviews that help protect sensitive data and manage emerging risks.
4. **Adoption and Enablement —** Help employees use AI effectively through prompt libraries, onboarding, and ongoing coaching that build confidence, encourage adoption, and improve productivity.
5. **Reporting, Review, and Commercial Hygiene —** Quarterly leadership reviews connect AI usage and performance to defined business use cases, providing clear insights into results and measurable value.

2.4x greater revenue growth among AI-mature companies compared with less mature organizations, according to BCG's 2026 research.

What You Get

- **Ongoing Support:** Monthly adoption and enablement activities that encourage consistent AI usage and long-term value.
- **Purpose-Built AI Agents:** Developed around specific business needs and tested before deployment to support effective adoption.
- **Early Identification of Gaps:** Identify low adoption rates early and address challenges before they impact long-term results.
- **Measurable Business Value:** Quarterly reporting that tracks results against established baselines and helps guide future AI investments.
