SECUR-SERV

Managed Intelligence Services

Know where to invest. What to protect. How to move forward.

AI is creating new opportunities across the business. It's also raising new questions about cost, security, ownership, and value. Secur-Serv helps businesses make those decisions, protect their data and turn AI investments into measurable results.

AI adoption is moving. Results take intention.

58%

of U.S. small businesses report using generative AI.

~2/3

of global survey respondents had not begun scaling AI enterprise-wide.

AI decisions are business decisions.

More AI activity doesn't guarantee better results. Without a connected approach, businesses risk spending more, creating unnecessary exposure and missing the opportunities AI was meant to deliver.

Secur-Serv helps connect AI decisions to business priorities, operational execution and measurable results.

Five services. One connected approach.

Start with what your business needs today.

AI Intel Report

A complimentary, outside-in perspective on AI opportunities, risks and developments relevant to your business.

"Everyone's talking about AI. Are we already behind?"

AI Assessment

Validate AI usage, productivity opportunities, tool risks and data exposure with evidence, not assumptions.

"Our employees are using AI. I'm just not sure what they're using it for or what data they're putting into it."

AI Strategy & Roadmap

Align leadership on use cases, investments, governance and a practical plan for what happens next.

"Every department has ideas for AI. Where should we invest our time and money first?"

AI Foundations

Secure and configure identity, access, data, AI tools and agents for responsible implementation.

"Our team's already using AI, but is our data secure?"

Managed AI

Ongoing oversight of adoption, security, deployments and performance as business needs evolve.

"AI keeps changing. How are we supposed to keep up and get the results we expect?"

One partner. Wherever you are with AI.

Strategy, security, implementation and ongoing management connected to the technology, people and processes already running your business.
